

## UX PROJECT LEAD

xwerx

The UX Project Lead collaborates with a variety of internal and external teams to design solutions that meet strategic business objectives. You enjoy working with stakeholders and clients to take a project to completion.

Candidates will illustrate an ability to apply strategic thinking to all design work, and possess a keen understanding of interaction design patterns and trends.

The role requires excellent communication skills. You are an individual who can inspire product teams with their vision and have the dedication and work ethic to see projects through to completion.

### Requirements

A minimum of 2 years' experience as a UX Designer, information architect, product designer, visual designer, interaction designer, user interface designer, or similar role. The position may suit someone coming from a more "hands-on" design role, looking to take on more responsibility as a Project Lead.

Experience creating wireframes using standard tools of the design trade (e.g., Figma, Sketch, Adobe XD). The ability to bring these wireframes to high fidelity is not a requirement for the position but will be seen as an advantage to your application.

Proven knowledge of UX design trends, patterns, and industry best practice.

Proven ability to collaborate with multi-disciplinary project teams.

Excellent written communication and presentation skills. This is a client-facing role.

A degree in design, human-computer interaction, cognitive science, human factors or related field.

### Responsibilities

**Collaborate** - Work closely with a team of stakeholders, business analysts, developers and designers to guide UX design from the start to finish of a project.

**Design** – Create meaningful UX deliverables such as storyboards, sitemaps, wireframes, flowcharts, prototypes, UI designs, presentations that help the team to understand what to build.

**Iterate** – Revise and improve design based on user and client feedback. Interpret quantitative and qualitative data analysis to understand design problems and suggest solutions.

**Document** - Ensure that internal and external teams are well-informed on the progress of the UX design through well-written, clearly presented documentation.
